

What Lotion Is Best For You... **Tingle, Bronzer?**

We offer several types of tanning lotions. If you are a beginning tanner or you have not been in the sun for a while, you should start out with a tanning lotion from our "Browning Line". This lotion will help you achieve quicker tanning results to build up your base tan. We recommend using these lotions for your first 15 to 20 tanning visits and if you have sensitive skin. If you are an advanced tanner, you may wish to bump it up a notch and use a lotion from our "Tingle Line". Tingle products are formulated to elevate you past the tanning plateau, (the point at which you don't seem to be getting any darker). Our advanced lotions are formulated to absorb into your skin very quickly. Tanning lotions are recommended not only for a tan, but they are tan extenders and are extremely high quality skin care products that promote anti wrinkling. Please keep in mind, (Dry skin reflects light and acts as a sun screen). We also offer a moisturizer for you to extend the life of your tan and to prevent dry skin (Very important, especially in the winter months). Remember that indoor tanning lotions can be used outdoors and outdoor tanning products will damage the acrylic shields on the beds! If you are unsure about a tanning lotion that you have, please consult one of our tanning technicians before using it indoors. We are here for you!

Why Choose Tan Spa?

When most people search for a tanning salon they are usually price shopping and overlook the most important aspects that a first class salon offers. When you choose Tan Spa, you are getting the absolute finest amenities available. For starters, we have been in Business for **18 years** and have been open **7 days a week for 18 years!** We have been awarded the Wolff Systems First Class Tanning Salon award. Wolff Systems, awards the salons that use only Wolff Licensed beds, bulbs, and attend educational seminars annually. We have 35 tanning units and do not take appointments. You will never get charged for a **"No Show"** at our salon! We clean our units with top of the line sanitizer, so you can be assured that your tanning bed is sanitized every time you tan. At Tan Spa you have your own private tanning room with a fresh towel and sanitized goggles, along with a fan to cool you down while you tan. We have an area for ladies to remove your makeup! You can monitor your tanning time with the "on bed" timers. For added safety, we control your session at the front desk with our computer to avoid over exposure. We believe this feature is a necessity. We invite you to express any questions and/or suggestions you may have!

Thank you for considering Tan Spa, *Ted M. Mathia*
